Fullstack software engineer specializing in frontend architecture, system design, and high-scale web applications. I take products from scoping to production, owning ambiguous, high-impact initiatives end to end and raising the engineering bar around me, and shipping measurable results for applications serving millions of users.

PROFESSIONAL EXPERIENCE

Bunch – Senior Software Engineer

Berlin · Jan 2026 – Present

- Leading the migration of a legacy product into a modern codebase, reducing technical debt and unblocking faster feature delivery.
- Own the design system, driving UI consistency and reusable components across the product.
- Improving CI/CD infrastructure to make builds and releases faster and more reliable.

TypeScript · React · Svelte · Node.js · Tailwind

Handshake – Senior Software Engineer

Berlin · Jan 2024 – Dec 2025

- Owned several high-impact initiatives end to end (localization, career fairs, and an AI-powered recommendation system) from scoping through deployment, shipping on time and to a high quality bar.
- Led development of an AI-powered job-matching recommendation system that improved user engagement by 30%.
- Stepped in as interim team lead during my manager's absence: planned team workload, made technical and organizational decisions, and drove a project that became the foundation of the team's 2–3 month roadmap.
- Translated complex UI/UX designs into production code and partnered with backend teams to define and integrate APIs for a platform used by millions.

TypeScript · React · Next.js · GraphQL · Node.js · PostgreSQL · Supabase · Ruby · Tailwind

Wayfair – Staff Software Engineer

Berlin · Jun 2022 – Dec 2023

- Technical lead for a team of 7 engineers, delivering high-impact projects that exceeded milestones and contributed to revenue growth.
- Re-architected and upgraded the tech stack of an existing product, cutting defects by 60% and improving performance by 10%.
- Drove cost-reduction strategies that made the department profitable for the first time.
- Mentored engineers through technical guidance and code review, accelerating their growth and project outcomes.

TypeScript / JavaScript · React · Redux · GraphQL · Node.js · PHP

Inhubber – Lead Software Engineer

Berlin · Nov 2020 – May 2022

- Led a codebase refactoring and stack-upgrade initiative that reduced technical debt, lowered defect rates, and increased development team velocity.
- Built CI/CD pipelines that cut deployment time from several hours to 10 minutes, enabling reliable, repeatable releases.
- Initiated and led innovation work that shipped several new features and drove 20% revenue growth.

JavaScript · React · Redux · Node.js · Web3

Avid / GlobalLogic – Lead Software Engineer

Kyiv · Aug 2018 – Nov 2020

- Led a team of 6 engineers and designed a highly scalable architecture for international broadcasting products.
- Coordinated with product and design to deliver projects on scope and schedule; mentored developers toward greater technical ownership.

Blynk – Senior Frontend Developer (Tech Lead, IoT)

Kyiv · Jul 2017 – Jul 2018

- Technical lead for an IoT product; mentored junior developers, improving delivery speed and code quality.

Avid / GlobalLogic – Senior Frontend Developer

Kyiv · Apr 2014 – Jul 2017

- Built single-page web applications in collaboration with product and design teams, delivered on scope and schedule.
